

Adam Mosebach

Full Stack Web Developer
New York, NY

Professional Summary

My simple goal is to work with amazing people to create amazing things. I am a communicative, creative, and results-driven engineer who has a passion for finding the best solution to achieving a goal. I am a fun-loving, focused person who finds fulfillment in completing a task. Efficiency and user experience fuel my logical approach to crafting the ideal product.

Related Experience

Web Developer

Studio 27 | 2020

- Designed and built a site for a wedding company to showcase their Dilusso Designs for photo album covers using React
- Each frame can be customized with the couple's name, album color, and font size
- Font size can be increased or decreased all at once or per specific frame

Software Engineering Immersive Fellow

General Assembly | 2020

- Built and deployed projects with a React front-end and a MongoDB or Rails backend
- Worked on solo projects as well as in teams, dominated by a creative and collaborative atmosphere
- Daily morning stand-ups with either your team or supervising lead
- Peer review provided alternative solutions to problems

Developer

Morgan Stanley | 2006-2007

- Wrote automated processes for incoming trade records to be ingested and analyzed
- Provided error reporting for both the client and Morgan Stanley sides
- Provided customer service to large firms when further action was needed on client side
- Built a series of training videos to help incoming colleagues perform and onboard efficiently

Other Work

Professional Actor

Various Locations | 2007-2019

- Actor (and sometimes assistant stage manager) in various theaters across America, including a national tour and an international tour
